OBJECTIVE

Motivated BCA student with hands-on experience in HTML, CSS, JavaScript (basic to advanced), React.js, Tailwind CSS, and SCSS. Currently building backend development skills. Seeking a Frontend Developer role to apply strong web development fundamentals, build responsive and interactive user interfaces, and grow into a Full Stack Developer.

SKILLS

- Languages & Markup: HTML5, CSS3, JavaScript (Basic to Advanced)
- Frameworks & Libraries: React.js
- Styling: Tailwind CSS, SCSS (Sass), Responsive Web Design
- Tools & Version Control: Git, GitHub, VS Code
- Concepts: DOM Manipulation, Event Delegation, localStorage, Component-based Architecture, Callbacks & Promises
- Currently Learning: Backend Development (Full Stack path)

PROJECTS

Personal Portfolio Website

A cinematic, scroll-driven personal portfolio built to showcase my journey as a frontend developer. Features a frame-by-frame scroll animation hero section, sections for education, skills, and project case studies, in a responsive, dark-themed UI.

GitHub: github.com/rohit73848/Personal-Portfolio

macOS UI Clone (React)

A desktop-style macOS interface clone built with React, recreating the look and interactive feel of a macOS desktop environment in the browser — focused on component-based architecture and UI state management.

GitHub: github.com/rohit73848/mac-os

Snake Game

A responsive take on the classic Snake game with multiple visual themes (Cyberpunk, Retro, Light), level-based difficulty with unlockable obstacles, persistent high scores, and full mobile support (D-pad, swipe gestures, haptic feedback).

Live Demo: rohit73848.github.io/snake-game/

GitHub: github.com/rohit73848/snake-game

Image Editor

A browser-based image editing tool that lets users upload an image and apply adjustable filters (brightness and more), with reset and download functionality — built with vanilla JavaScript and the Canvas API.
